BETTER. SMARTER. FASTER™.

ICB 2.5™

THE INTELLIGENT CASH BOX SYSTEM

JCM Global®'s innovative Intelligent Cash Box (ICB®) 2.5 is your secret weapon to detailed reporting tailored to reduce variances, eliminate human error and capture transactions on the cash box for the most secure, robust data reconciliation possible. With Prime Reports™, you can access web enabled, encrypted reports anytime, anywhere and from any web browser or mobile device. Use them to customize data presentation to your specifications and streamline your entire drop process, all with a new, more user-friendly interface, keeping you ahead of the game!

FEATURES

· Electronic asset management

· ICB 2.5 Prime Reports™ module

· Bill validator firmware report

· Total bill validator performance metrics

BENEFITS

· Speed up drop process

· Reduce variances

· 100% acceptance on new currency updates

· Deliver unfiltered bill validator reports

ICB® SYSTEM PACKAGES

BASIC

ICB 2.5 Basic empowers your casino to manage your cash box collection process. ICB 2.5 Basic comes complete with printer, docking station, MDM 2, ICB ticket software, ICB bill validators, and ICB equipped cash boxes.

PRIME

ICB 2.5 Prime comes with all the equipment of ICB 2.5 Basic and has the added power of Prime Reports™. With web-enabled Prime Reports, you can access your reports from any web browser or mobile phone, fully encrypted and password-protected for your safety.

Prime Reports give you complete information on acceptance rate, acceptor version, duplicate assets, error codes, revenue, system log, activity log and asset details like acceptor version history, error history, reject history and acceptance history. You can even export to PDF or to Excel® format.

INTELLIGENT CASH BOX

iVIZION® 600/1000 NOTE INTELLIGENT CASH BOX (ICB®)
The durable, high impact resistant cash box utilizes RFID communication technology for downloading the ICB Memory Module.

UBA® 600/1000 NOTE INTELLIGENT CASH BOX (ICB)
The durable, high impact resistant cash box utilizes IR communication technology for downloading the ICB Memory Module.

SOFT COUNT ROOM PROCESS

Dock - Download - Reset
Dock the ICB cash box on the Combo R/W Tool - downloads and resets the cash box Memory Module.

Transmit Data
The R/W Tool transmits the asset data to the Printer Station - sends all base line transaction data to the MDM 2 Computer/Server.

Redistribute
The downloaded ICB cash boxes are now ready to be redistributed back onto the slot floor.

Consolidate Asset Data
The printer station generates a bar-coded ticket with asset data and is consolidated with the notes and TITO tickets removed from the cash box - all loaded into the Count Sort Device.

Generate Reports
Cash box Memory Module data plus Count Sort Device data is transmitted to the MDM 2 Computer/Server.

PRINTER STATION
Prints critical asset and collection information gleaned from the cash box download and generates this in a bar-coded format for use in the Count Sort devices. (See below for Count Sort compatibility.)

MDM 2 COMPUTER/SERVER
Receives all data downloaded and generates the entire ICB suite of Prime Reports.

COMBO READ/WRITE TOOL
Designed to download both the UBA and the iVIZION cash box data.

COUNT SORT MACHINE	OPTIONS	PRINTER TYPE
Cummins-Allison®	Jet Scan™ MPS	SATO M-5900RV
Giesecke & Devrient® (G&D)	Deg Linker (none), Label Tracks (IMPACT)	
Toshiba®		JCM (TSP-02, PayCheck 4), Epic 950
De La Rue®		JCM (TSP-02, PayCheck 4), Epic 950
Glory®		JCM (TSP-02, PayCheck 4), Epic 950

ICB® 2.5 THE INTELLIGENT CASH BOX SYSTEM

PRIME REPORTS™

SYSTEM REQUIREMENTS

· Prime Reports™ Hosting Server – Minimum Requirements
- o Microsoft® SQL Server® Express 2005 or SQL Server 2005
- o 2 GB of RAM
- o IIS Version 5.1
- o 4 GB or more of available hard disk space. Prime Reports will initially consume around 100 MB, and will increase in size by 300 MB per year for every 1000 daily drops.
- o Single Core processor of 2.2 GHz or higher.
· Workstations that will be used to view Prime Reports
- o Prime Reports has been tested as compatible with Microsoft Internet Explorer 8.0.6.
- o 1 GB of RAM
- o Single Core processor of 2.2 GHz or higher.

OPTIONAL REQUIREMENTS

· To enable SSL, a certificate will need to be issued to the computer or server hosting Prime Reports. Issuing a certificate from a trusted certificate authority, either on your network or from a third party like VeriSign® will prevent phishing warnings from being displayed to users.

· Software Reporting: IE® 8.0 or Firefox® 3.6

· Compatibility: Windows® XP, Vista, and 7

· Screen Resolution: 1024 x 768 minimum

· Minimum System Requirements: 32 or 64 bit Single Core – 2.0 Ghz, Dual Core – 1.5 Ghz

· Power Requirements & consumption: Varies depending on PC configuration

CASH BOX

DIMENSIONS (HxWxD)

Model	UBA®
