

RF Module

SRT-125

SRT-125 series are compact sized of manual proximity type radio frequency card reading /writing module, which supports EM, TEMIC, HID & INDALA cards based on 125KHz securing access.

Features

- Support ASK/FSK/PSK
- Internal ANT
- Various Interface
- WDT included
- Compact & user friendly design
- Low cost with reliable quality
- Possible customize for OEM

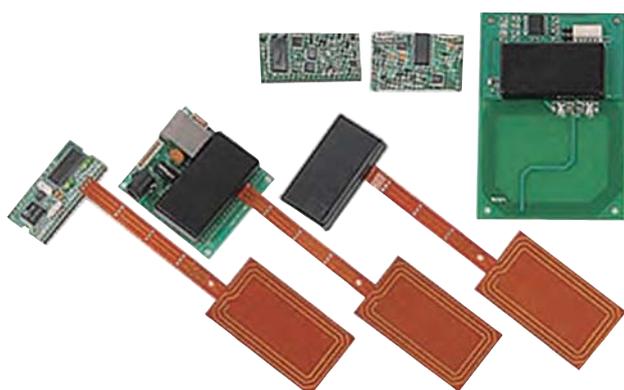

KEP-1356

KEP-1356 is advanced reader writer that can reads multiple tags such as Mifare Classic 1K, Mini & Ultralight, Tag-it, I-code under 13.56MHz from a distance of up to 60 mm (the distance is vary as per tags) under ideal conditions. This unit provides for easy installation and is a suitable hardware solution that can be integrated into POS, Vending machine, etc. where multiple tags readers for long lines are required.

Features

- Built in Antenna
- Compatible with various tags
- 4 mounting holes
- Compact & user friendly design
- Low cost with reliable quality
- Available customize / modification
- Dimension: 80x80x10(mm)

SRT-1356

SRT-1356 series are compact sized manual proximity card reading/writing modules which support Mifare, ISO-14443 Type A, B & ISO-15693 cards under 13.56MHz secure transaction.

Features

- Single power supply
- T=CL protocol
- Including WDT
- Compact & user friendly design
- Low cost with reliable quality
- Possible customize for OEM
- Possible Anti-collision
