Touch monitor 17" POE

Essential design and well industrialized

17" monitor available in a version without a touch panel, but easy to integrate. Developed based on Asus IoT boards: Tinker R2.0 paired with a POE splitter and a MIPI converter for the LVDS signal. Easily installable thanks to the provision for standard VESA mounts and full compatibility with the POE+ standard, which allows powering the monitor through a simple LAN cable.

FEATURE HIGHLIGHTS
