# Assembled touch 10.1" indoor

## Essential design and well industrialized

TFT 10.1" assembled with a 3 mm capacitive touch screen featuring Anti-Fingerprint treatment to prevent dirt buildup and facilitate the runoff of water vapor that may form on the screen surface in certain applications. The TFT and touch screen are bonded together using OCA (Optical Crystal Adhesive) technology, which allows the colors to stand out and makes the assembly more resistant to impacts. LVDS connection for easy integration with the client's PC
